

Supplemental Benefits DECLINABLE DRUG LIST

This Declinable Drug List applies to First Diagnosis Cancer and Heart Attack & Stroke Insurance, insured by Loyal American Life Insurance Company. X indicates that the drug will result in a decline. Make sure to list ALL medications on the application. Prescription medications may be used for multiple reasons. ALWAYS determine how the medication is used. Insurability is based on the conditions listed on the actual application. There may be additional medications and conditions not listed that could result in a decline.

If the applicant is currently taking, or has recently taken, a medication in this list for a use that is NOT listed on this application, we will REQUIRE a SIGNED and DATED letter from the prescribing physician. This letter MUST state the condition for which the medication is being taken AND must state that the applicant does not have the declinable condition on this list. Failure to include this letter WITH the application may lead to the declination of the application.

Please note that the Underwriter will make the final determination in all cases.
